

HOP REPORT

MONTH - APRIL

YEAR	2015	2014	30-years average
avg. temperature	8,7	10,9	8,5
precipitation	34,0	61,6	32
	Day	Value	
max. precipitation	28.4.2015	12.8	mm
min. temperature	07.04.2015	-3,9	°C
max. temperature	15.04.2015	24,1	°C

Comments	<p>April was above average as to temperatures and precipitation compared to 30-years average. Significant precipitation occurred at the end of the month. The course of weather in April was suitable for spring works in hopyards. Wire-stringing and root cutting were finished in all hopyards by the end of April, ca 50% of them are also staked into soil. The height of hopplants was between 0 - 70 cm (depends on time of root cut). Chemical protection against alfalfa snout beetle was effected in some hopyards. The hopplants are in a good health condition.</p> <p>We estimate an increase of acreage of Saaz variety about 150 – 200 ha compared to last year. The exact acreage will be informed additionally as it should be announced by UKZUZ within next few days.</p>
