

HOP REPORT

MONTH - July

YEAR	2014	2013	30-years average
avg. temperature	20,0	20,3	18,0
precipitation	127,6	37,6	59,0
	Day	Value	
max. precipitation	28.7.2014	25,0	mm
min. temperature	03.07.2014	7,1	°C
max. temperature	20.07.2014	33,4	°C

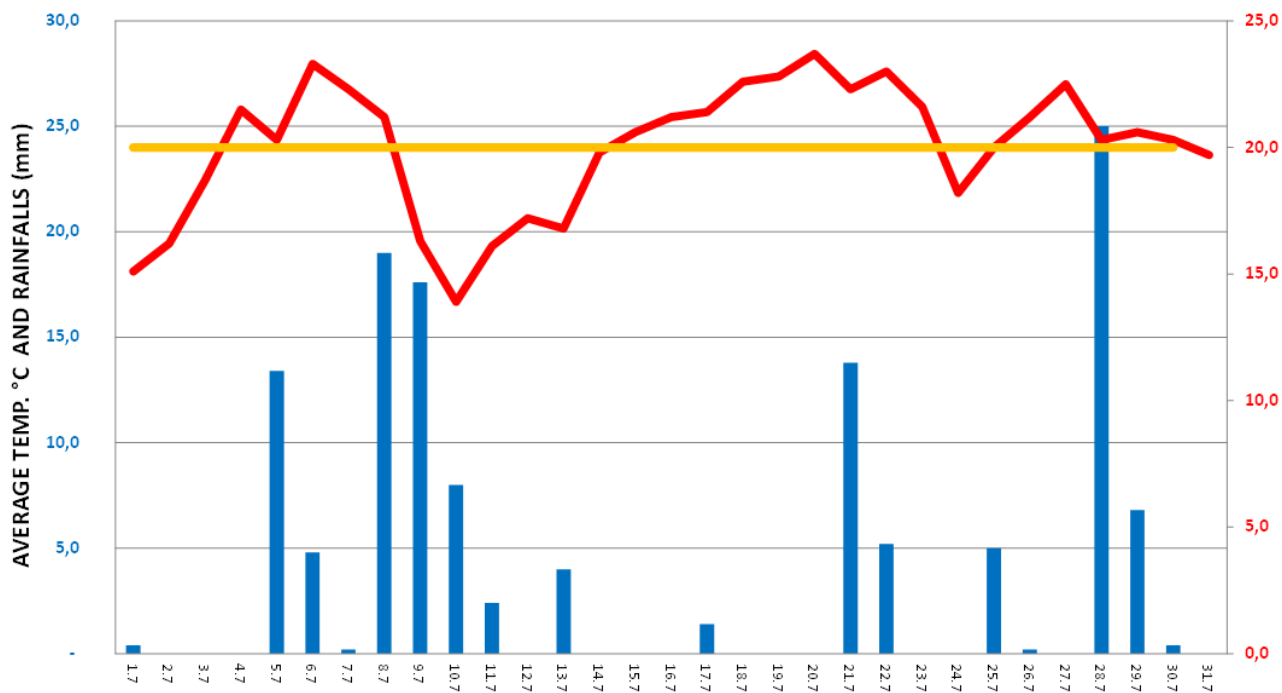

Comments	<p>July was as to the temperature above the 30 years average and as to the precipitations high above the 30 years average. Hopplants are in the phase of blossom and hop cones creation. Chemical protection was done against Downy Mildew, Aphides and Red Spider Mite. Health conditions of hop plants are very good. There is quite a big difference in the size - growth of hop plants among the hop gardens. Some hop gardens have plants which still did not reach the top of constructions. Taking into the consideration all the circumstances we expect average crop for Saaz Saaz i.e. approximately 1,1 MT/1 ha now. Farmes will start with the harvest between 18th and 20th August.</p>
