

HOP REPORT

MONTH – JULY 2024

YEAR	2024	2023	30-years average
avg. temperature	20,7	20,1	19,2
precipitation	38,4	66,4	76,3
	Day	Value	
max. precipitation	12.7.2024	21,1	mm
min. temperature	30.7.2024	6,8	°C
max. temperature	31.7.2024	33,4	°C

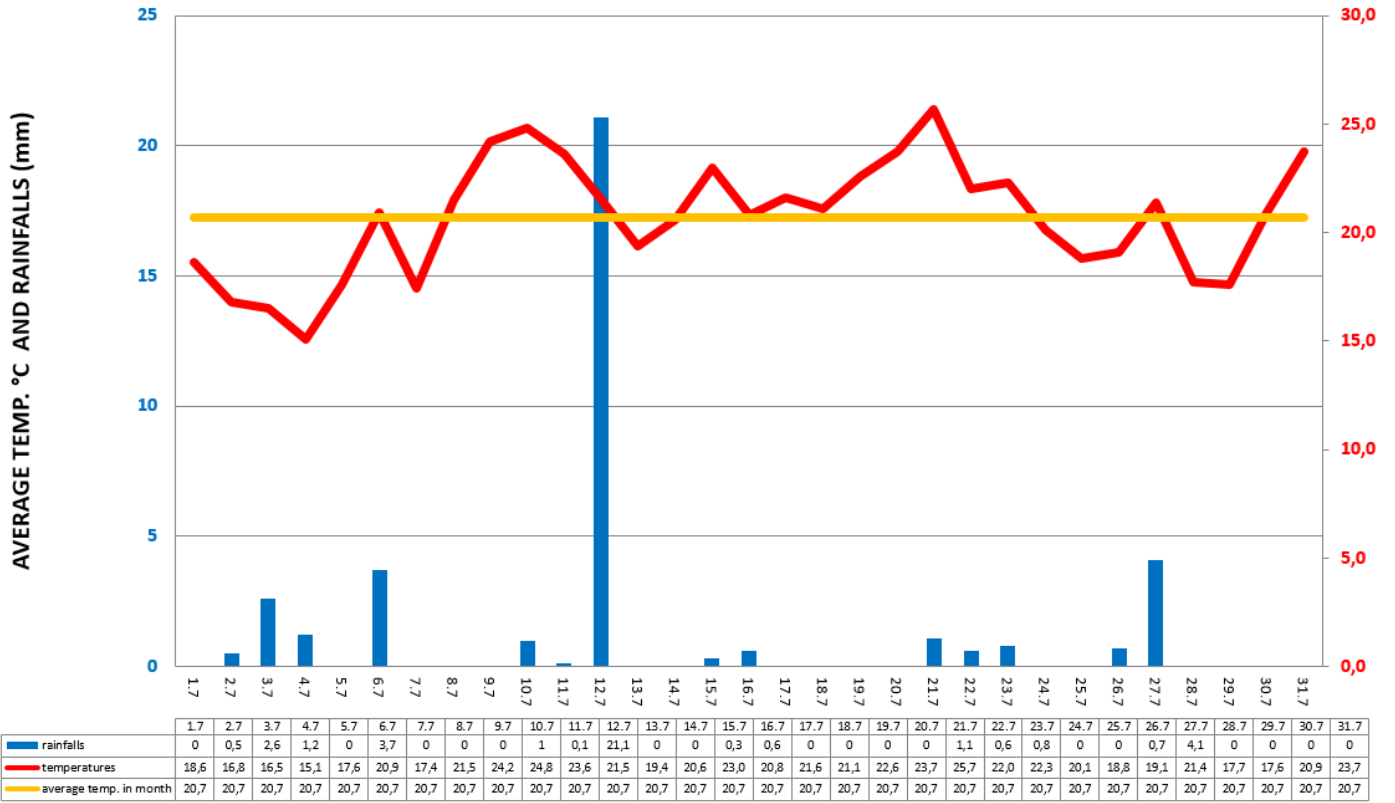

Comments	<p>The month of July was above average in temperature and below average in precipitation compared to the thirty-year average. Significant precipitation accompanied by thunderstorms occurred in some areas. The vast majority of hop plants have reached the top of the trellis and are in the phase of blossom and cones creation.</p> <p>Chemical protection against downy mildew and red spider mite was effected. Hop plants are in a good health condition. Based on the current conditions an average or slightly above average yield can be expected depending on the further development of the weather. Most farmers plan to start harvesting between 17th and 20th August.</p>
