

HOP REPORT

MONTH – JUNE 2017

YEAR	2017	2016	30-years average
avg. temperature	18,9	18,1	17,0
precipitation	59,4	91,0	59,1
	Day	Value	
max. precipitation	29.06.2017	27,6	mm
min. temperature	02.06.2017	7,0	°C
max. temperature	22.06.2017	34,4	°C

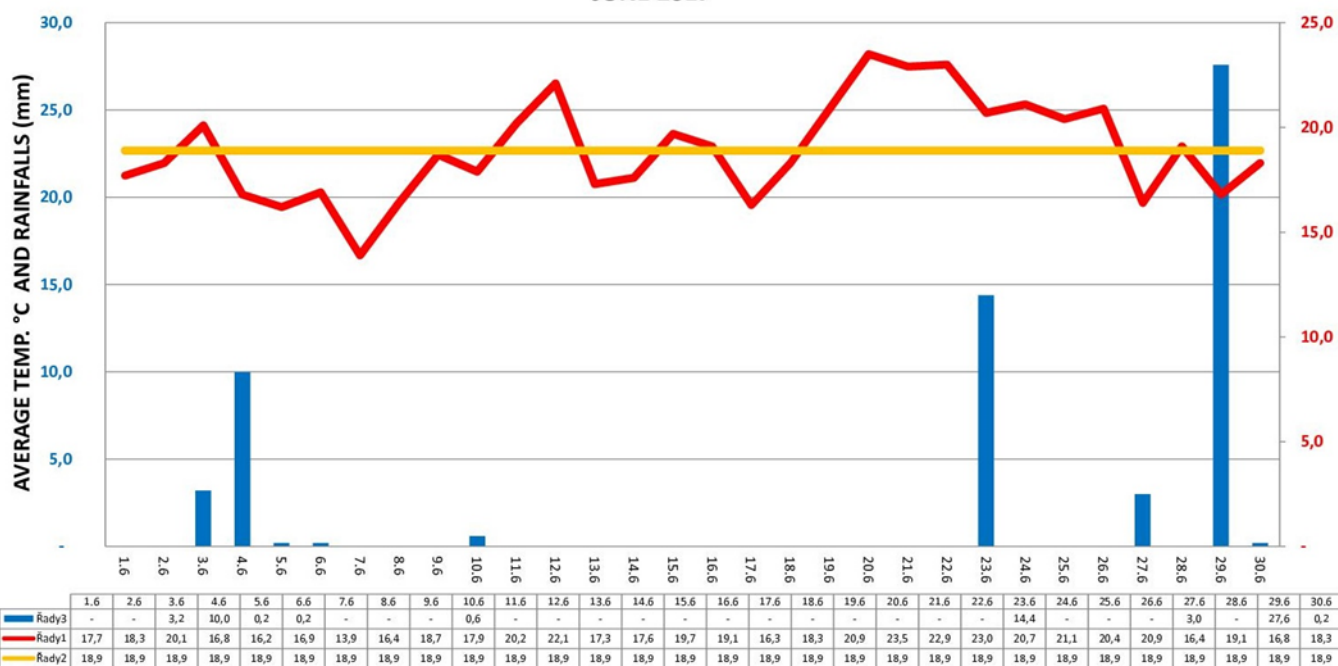

Comments	<p>June was above average as to temperatures and on average as to precipitation compared to 30-years average. Some hopplants did not reach the top of the trellis. The hopplants are slowly starting to sprout (side branches) and are starting to bloom.</p> <p>Compared to the previous year, part of the growth is significantly weaker (later the training, older growth).</p> <p>Chemical protection against downy mildew, aphides and red spider mite was continually performed.</p> <p>The hopplants are in good health condition.</p>
