

# HOP REPORT

## MONTH – June 2023

YEAR	2023	2022	30-years average
avg. temperature	18,4	19,0	17,4
precipitation	58,0	47,0	65,4
	Day	Value	
max. precipitation	30.06.2023	32,7	mm
min. temperature	04.06.2023	1,8	°C
max. temperature	26.06.2023	32,8	°C

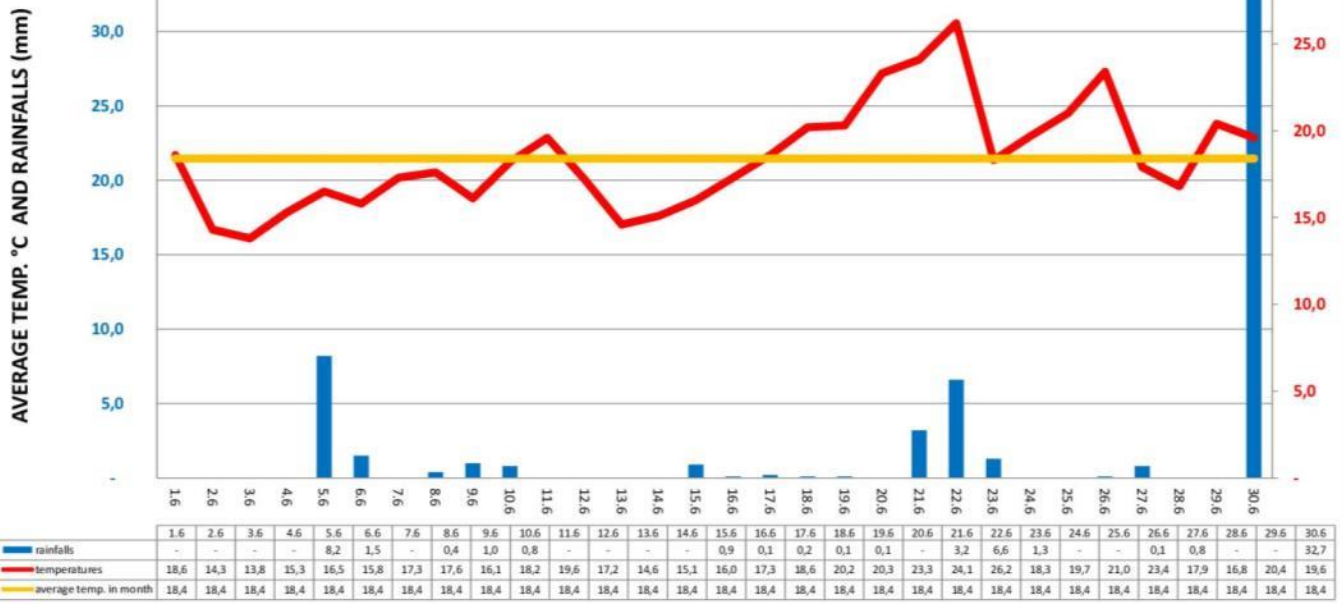

Comments	<p>June was below average as to precipitation and above average as to temperature compared to the 30-year average. Significant precipitation was local and mostly thunderstorm in nature. There was no significant damage to crops during the storms.</p> <p>In some, mainly older hopplants, the lack of water in combination with higher temperatures has become apparent. The plants are weaker and have not reached the top of the trellis yet. In contrast, the younger plants have coped better with the lack of water and higher temperatures and are in good condition. Hopplants are making side branches, the older ones earlier cut are starting to bloom. Chemical protection against downy mildew, aphides and red spider mite was continually performed. The hopplants are in good health condition.</p>
