Comments	<p>June was below average as to precipitation and above average as to temperature compared to the 30-year average. Significant precipitation was local and mostly thunderstorm in nature. During storms, hailstorms occurred locally - in Ustek, 80% of 30 ha of hops were damaged - ZEPOS Radovesice (not a supplier of ZHC).</p> <p>Most of the hop plants have reached the top of the trellis and are forming side branches and starting to bloom. Chemical protection against downy mildew, aphides and red spider mite was continually performed. The hop plants are in good health condition.</p>
