

# HOP REPORT

## MONTH - MAY

YEAR	2019	2018	30-years average
avg. temperature	11,6	16,5	14,2
precipitation	96,2	60,8	52,0
	Day	Value	
max. precipitation	28.5.2019	57,6	mm
min. temperature	7.5.2019	-2,6	°C
max. temperature	27.5.2019	25,0	°C

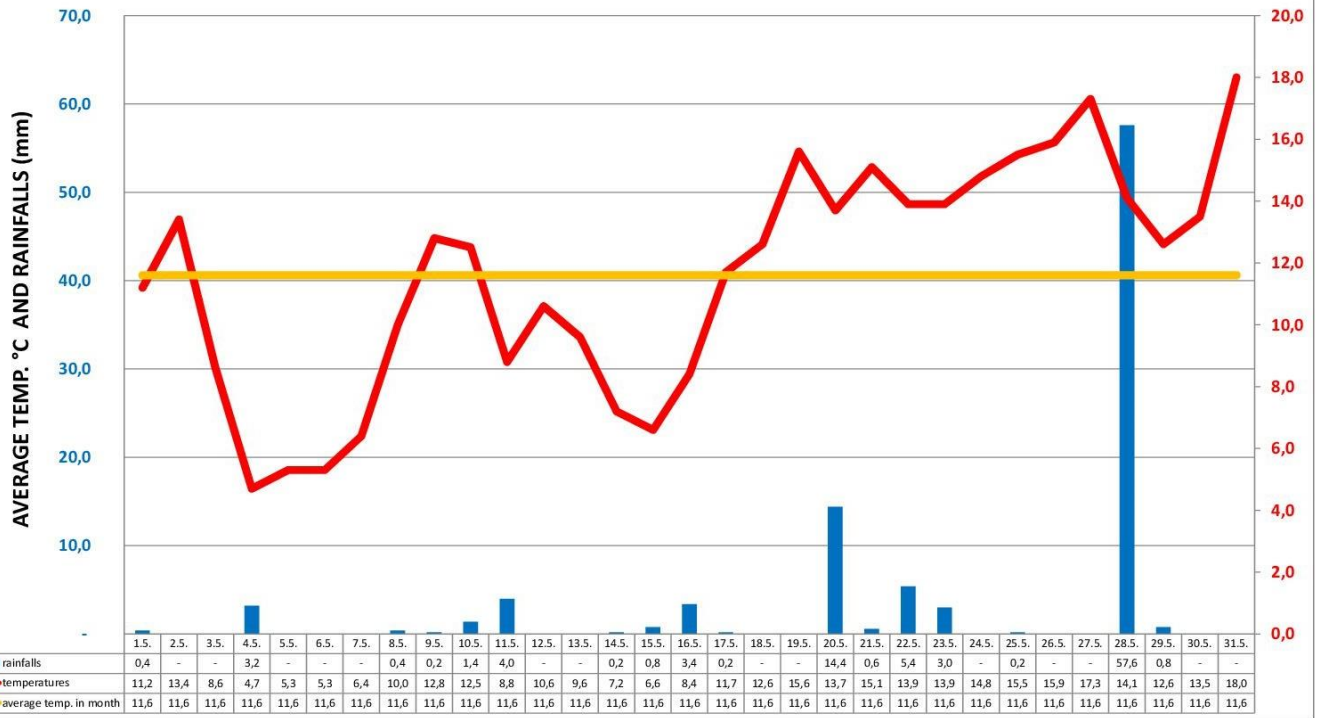

Comments	<p>May was below average as to temperatures, especially the first half of month was very cold, and above average as to precipitation compared to 30-years average. Most of hopgardens are already trained. The height of hopplants is between 1,5 and 3 meters depending on time of rootcut. Some later cut hopgardens will be trained at the end of May and the beginning of June and the growth of these hopplants is one week delayed compared to average year (max. 5% of acreage). Chemical protection against alfalfa snout beetle and downy mildew was effected in time. The hopplants are in very good health condition.</p>
