

# HOP REPORT

## MONTH – May 2023

YEAR	2023	2022	30-years average
avg. temperature	13,8	15,4	14,0
precipitation	7,2	29,8	51,9
	Day	Value	
max. precipitation	14.05.2023	2,4	mm
min. temperature	04.05.2023	-1,1	°C
max. temperature	22.05.2023	27,6	°C

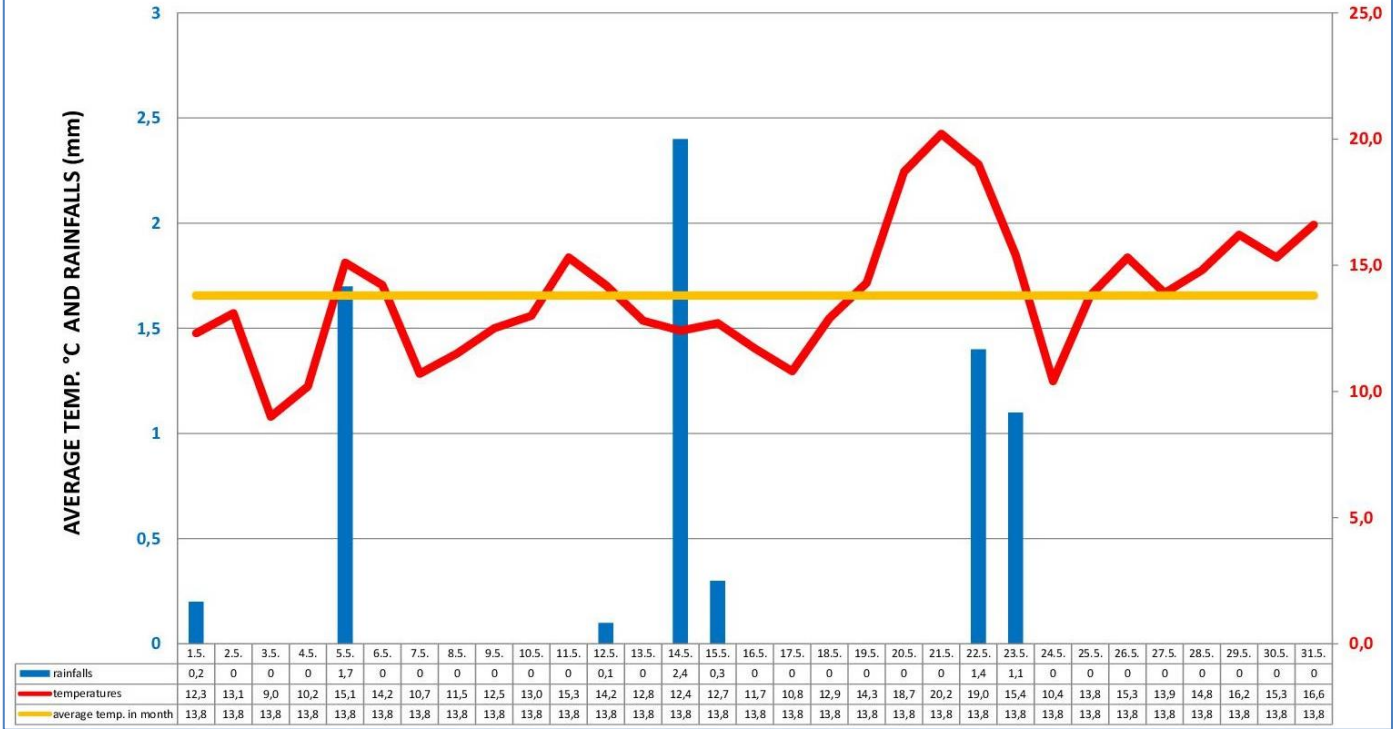

Comments	<p>May was below average as to precipitation and temperature compared to the 30 year average. No significant precipitation occurred during the entire month. The first two decades of the month were cold, in the third decade it warmed up and the hop plants caught up with the delay in the growth phase. All hopgardens are already trained, corrective training is taking place in some of them. Plant height varies from 1,5 m to 3,5 m. Continuous protection against downy mildew and locally, depending on the occurrence, against the alfalfa snout beetle, flea beetle and aphides was effected. The hopplants are in good health condition.</p> <p>The lack of water during the month has so far only affected the newly established hopgardens.</p>
