

HOP REPORT

MONTH – MAY 2025

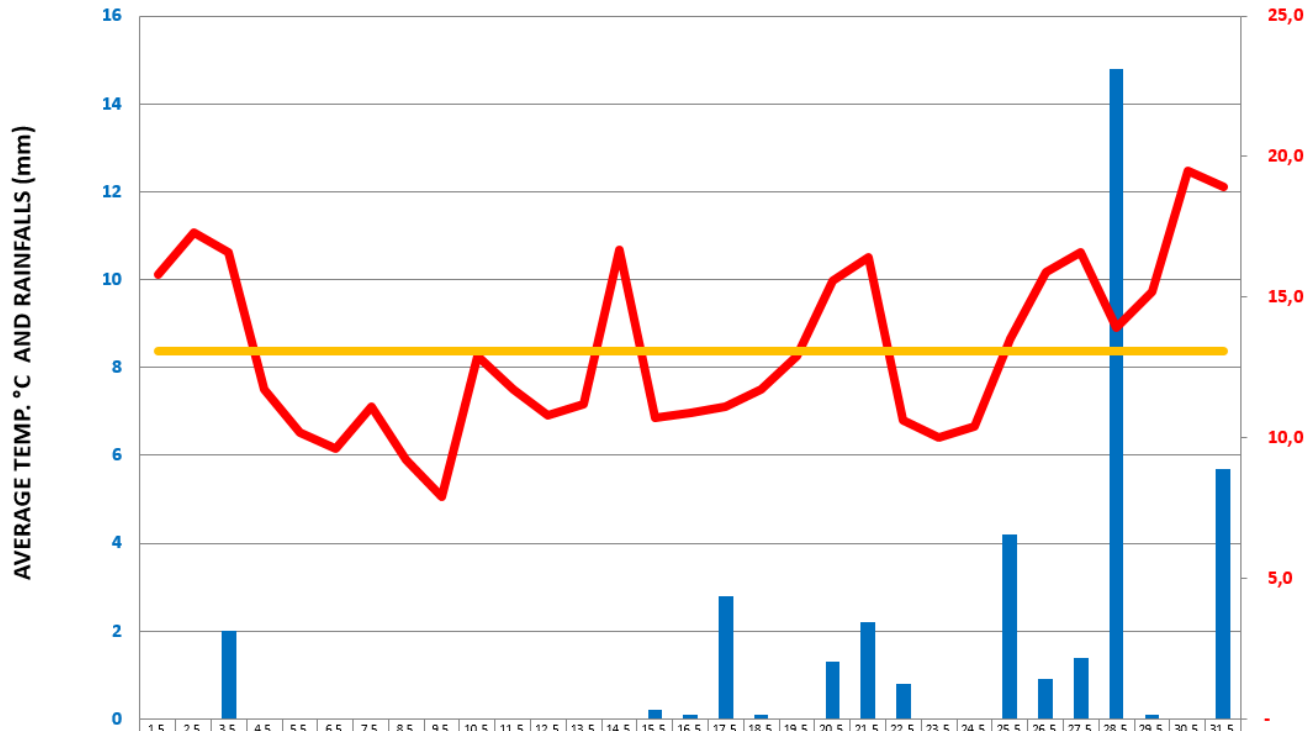

YEAR	2025	2024	30-years average
avg. temperature	13,1	15,3	14,0
precipitation	36,6	98,0	51,9
	Day	Value	
max. precipitation	28.5.2025	14,8	mm
min. temperature	9.5.2025	-1,1	°C
max. temperature	2.5.2025	28,9	°C

Comments	<p>The month of May was below average in terms of temperature and precipitation compared to the 30-year average.</p> <p>The cool weather affected the growth, especially of later-cut hop gardens, where training took place only at the end of the month. These crops are slightly delayed in their growth stage. Hop training has been completed, corrective training is taking place in some areas. The plant height ranges from 1 to 3.5 meters.</p> <p>Protection against downy mildew was carried out and, depending on local occurrence, also against alfalfa snout beetle, flea beetle and aphids. The health condition of hop plants is good.</p>
